The Company

Continuous technological and eco-sustainable growth, to improve the product and performance

All three springs Santaflora, Perla and Fonte de 'Medici are bottled in the Monte San Savino plant, the latter representing the excellence of Tuscan water present in the Ho.Re.Ca channel and in the Export channel. The company is spread over an area of about 130 hectares, of which 14,000 are covered plus another 14,000 ready to be built to ensure future development.

From a technological point of view, the company has state-of-the-art plants capable of producing at high quality standards and high levels of efficiency. In addition, the company, which is very sensitive to the environmental issue, has installed about 1.7MW to also ensure energy self-sufficiency.

la Toscana

Strongly linked to their Tuscan identity, our sources are the symbol and the synthesis of the values and magic of this splendid land of ours. Art, history and culture have made Tuscany famous all over the world. Its unrepeatable landscapes, its intact and generous nature, which has always been able to give good fruits, unique flavors and excellent mineral waters.

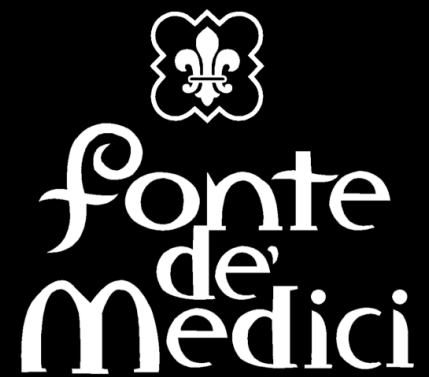

Waters whose virtues of purity and taste have been appreciated since ancient times by the Etruscans and Romans, waters that have remained intact and unchanged to this day, also through our constant commitment.

the Sources

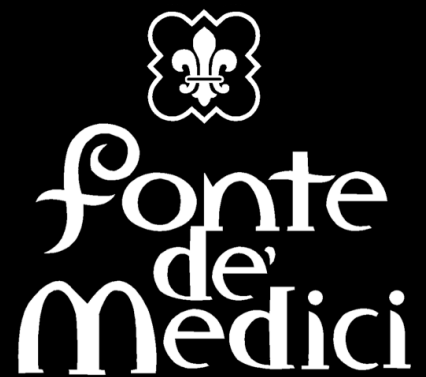

The Santafiora, Perla and Fonte de 'Medici springs come from an uncontaminated subsoil with an ideal geological composition, characterized by rich and pure aquifers.
